

Telescoping mounting posts allow the Aristos to be effortlessly attached to any general surgical table

Traction boots can be removed intraoperatively to perform a range of motion check

Ball joint at the heel enables infinite adjustments

Perineal post system slides left to right for pinpoint precision positioning

Decrease turnaround times by reducing setup to under one minute.

Fine traction can be tuned by rotating the handle

Laterally rotate the patient's leg away from the spar, granting unparalleled C-arm access for optimal radiolucent imaging.

Gross traction is easily adjustable with the pull of a trigger.

In-line axial rotation for maximum control

Revolutionary weightless positioning technology enables you to instantly lock the spar into place by simply releasing the handle.

SchureMed has teamed up with orthopedic surgeons to revolutionize lower extremity surgical procedures - introducing the *Áristos Orthopaedic Extension*.

Elevate your patient positioning experience with SchureMed's new orthopedic extension, *Áristos*! This groundbreaking solution provides a sleek, lightweight design and intuitive controls that make lower extremity surgical procedures better than ever before.

Áristos orthopedic extension transforms general surgical tables into cutting-edge orthopedic fracture tables, allowing surgeons to improve turnover times and provide their patients with the highest level of care. This innovative solution can transform any operating room into a high-end trauma center!

Cutting-edge orthopedic fracture tables have never been more attainable! With *Áristos*, operating room technology is within reach - offering convenience and affordability - like no other.

Features

Leveraging the revolutionary properties of *Áristos*, surgeons can now free themselves from the constraints posed by traditional fracture tables and orthopedic extensions. With its ability to laterally rotate a patient's leg away from the spar, surgeons are granted unparalleled C-arm access for optimal radiolucent imaging.

Simply squeeze the trigger, to harness the power of gross traction and wield precise control over smooth and steady lineal bearings

Turn the handle to dial in or out just the right amount fine traction to suit your needs. Experience smooth motion and maximum precision as adjustments are quickly made for optimal performance!

Unlock superior control with in-line axial rotation, conveniently marked for precise positioning.

Áristos traction boots give surgeons unprecedented control over the range of motion during surgery. The ball joint at the heel allows for fluid adjustments in external and internal rotation - providing maximum flexibility to achieve desired outcomes.

Revolutionary *Áristos* weightless positioning technology enables you to keep your patients and staff safe with the release of a trigger. Instantly locking into place, it's the ultimate assistant for any operating room!
